Travelling

Cycling

SUMMARY

I am a developer with more than five years experience in the field. I like to challenge myself constantly, and to work in a dynamic environment.

I strive to deliver solutions that can be easily maintained, and that create additional value for the clients. I find it valuable to learn from other team members, and to get inspired by them.

WORK EXPERIENCE

Software Developer Planday

2019 - ongoing

As a back-end developer in the mobile team I work with both microservices written in ASP.NET and .NET core as well as with the legacy product based on web forms. I am used to writing unit tests and working iteratively with the team members and the product owner.

System Consultant Twins

2017 - 2019

As a system consultant I am responsible for developing digital solutions and maintaining dialogue with the customers. I am currently lead developer on several Dynamicweb based projects, but I also have hands-on experience with Umbraco, Sitecore CMS and front-end frameworks like Angular js and vue js.

System Developer Evision

2015 - 2017

I was responsible for maintaining and developing the .NET based e-commerce framework. The framework acts as a bridge between a .NET based CMS system, like Umbraco or Sitecore, and a Microsoft ERP system, such as Navision or C5.

Web Developer Freesoft

2014 - 2015

I have developed Freesoft 3.0, an on-line management, and accounting system for craftsmen. My responsibilities varied from building the GUI of the system, to writing back-end PHP code, managing databases, reading data from external sources, and generating PDF or Excel files.

Web Developer

Intern

Mirsc

2013 - 2013

As intern in MIRSK, a medium-sized Danish company working with speech recognition, I have contributed by developing and maintaining e-mail templates using XHTML and Marketo. I have also participated in re-designing the webpage of the company.

EDUCATION

KEA PBA - Web Development

2014-2015

Copenhagen

A web developer has practical knowledge of building web applications of all sizes. A graduate is trained in working with all the programming aspects of an application from front-end to back-end, as well as databases and deployment.

KEA AP - Multimedia Design

2012-2014

Copenhagen

A Multimedia Designer has knowledge about marketing, design, coding and organization. Software development methods like SCRUM and Waterfall are used extensively throughout the programme.

UBB BA - Human Sciences

2008-2011

Cluj-Napoca

A graduate of Humanities has the skills necessary to express his ideas and thoughts effectively both orally and in writing. The curriculum revolves around the study of grammar, vocabulary, literature and phonetics of the aforementioned languages.
