Lithuanian - native

PROFILE

I am a UX designer with experience in researching and developing solutions that meet both users' needs and business goals. I have more than 3 years of working experience with development and implementation of product and web design.

EXPERIENCE

UX Designer - Nordija

January 2017 - ongoing

As a UX designer I organize user research that provides the basis for a new IPTV solution. The solution improves overall navigation and the content discovery process for end-users. The solution is designed to fit multiple platforms with specific focus on iOS and Android devices.

Graphic Designer - Evision Inovation ApS

January 2016 - 2017 January

I worked as a graphic designer on a project basis. I have created logo designs for the company's products and visual elements for print and web. The graphic material was used to improve overall communication with the clients and business partners.

UX and UI Designer - Freesoft ApS

August 2015 - November 2015

During my internship I have solved various design-related tasks. I carried out user research that I used to map out a new user journey. This led to overall improvements in the user interface of the company's products (KidsMonitor SFO apps for parents and teachers).
